

A high-speed photograph of water being poured into a clear glass. The water is captured mid-pour, creating a dynamic stream that splashes into the glass, forming numerous bubbles and ripples. The background is a soft, light blue gradient, emphasizing the clarity and movement of the water.

*What's in **your water?***

ECOWATER
SYSTEMS®

Your Water. Perfected.

Do You Know **What's in Your Water?**

DOES YOUR WATER SMELL STRANGE?

- Sulfur/rotten egg smell
- Chlorine/swimming pool smell

HOW DOES YOUR WATER TASTE?

- Does your water have a metallic like taste?
- Does your water taste fishy, musty or earthy?

HIDDEN CONTAMINANTS

- Many contaminants in your water aren't visible to the naked eye.
- Did you know that 60% of potential water contaminants are not currently regulated by the EPA?

You don't have to live with problem water. Take the first step and contact an EcoWater Pro for your free water analysis today.

Water Problems **Effect All of Us**

Millions of Americans are exposed to unsafe drinking water

HOW DOES THE WATER BECOME CONTAMINATED?

Industrial dumping, farming pollution and water plant distribution pipe deterioration have taken a toll on local water systems.

CRISIS

Many people turned to bottled water as a solution, which has dramatically increased plastic pollution in landfills, rivers and oceans.

HOW ARE YOU PHYSICALLY EXPOSED?

- Drinking/ingesting
- Bathing
- Cooking
- Other household use

WATER CONTAMINANTS THAT PROPOSE HEALTH RISK

- Arsenic
- Lead
- Nitrates
- TDS - Total Dissolved Solids
- PFOA/PFOS
- Disinfectants
- Pesticides

EcoWater Solutions

Drinking Water Systems

EcoWater Systems is a world market leader for residential water treatment systems, also offering solutions for commercial and industrial applications. EcoWater has been offering innovative technologies, quality products and superior service for over 90 years.

- Drinking
- Ice cubes
- House plants
- Coffee and tea
- Baby formula
- Steam irons
- Cooking
- Juice concentrates
- Healthy Pet Water

EcoWater offers a variety of reverse osmosis water systems. An RO drinking water system uses a thorough process that pushes water through multiple filters and sheds dissolved solids along the way.

An EcoWater drinking water filtration system is more convenient and less costly than buying bottled water. Best of all, it pays for itself over time and makes a difference you will notice every day. Your EcoWater Pro can determine the filtration system that best suits your needs.

EcoWater Solutions

Whole Home Filtration Systems

The water in your home may have several issues that need to be corrected, from hardness (mineral deposits) and turbidity (suspended dirt) to bad tastes and smells (chlorine odor). Your water may also contain things you can't even see, such as nitrates or other potentially harmful contaminants. If your water looks, tastes or smells bad, remedying the water at each tap as well as providing the best, purest drinking water is the answer. EcoWater's whole home water conditioning systems help you get there.

EcoWater's solution combines the power of softening and filtration.

A water conditioner system paired with a water filtration system creates a customized solution to meet your needs – whether your water comes from a municipal supply or private well or if you live in an area where there are water restrictions.

EcoWater Advantage/Differentiating Factors

1 HYDROLINK PLUS TECHNOLOGY - Receive real-time product & usage alerts on your smart phone or tablet

2 REMOVAL OF CONTAMINANTS SUCH AS PFOA, PFOS AND VOC'S

3 ADDITIONAL FILTERS AVAILABLE INCLUDING ALKALINE WATER

Why EcoWater Systems?

- We've been providing families with high-quality US manufactured water treatment systems since 1925.
- We're one of the largest manufacturers of residential water treatment systems in the world represented by an international network of professional water treatment dealers.
- We offer an extensive consumer protection package including:
 - Advantage warranty
 - Crest of Excellence, providing provisions for system replacement within one year if product has a repetitive uncorrected problem
 - Perfect 10, an optional extension of the electronics warranty
- We've earned the following agency seals/certifications:
 - Water Quality Association Gold Seal
 - Canadian Standards Association
 - FCC Standards IC3590A-7695 compliant remote
 - NSF International against NSF/ANSI Standard 44 for the reduction of Barium and Radium 226/228, hardness reduction and efficiency, and NSF/ANSI 372 for low lead content
